i. Education in China

Scholarship politics in China

The main Chinese organization in charge of scholarships is the Chinese Higher Education Institution (HEI). Chinese universities offer both the possibility of enrolling for studies which last a couple of years and terminate with obtaining a Bachelor, Master or PhD degree, as well as non-degree programs teaching language. The majority of offered degree courses is held in Chinese, however in last years an increasing number of English- taught degree programs are available. Institutions of Higher Education in China offer preparatory courses in Chinese, which take 1-2 years depending on a degree course. A full list of English degree programs can be found here:

<http://en.csc.edu.cn/Laihua/collegenewssearchen.aspx?keyword=&PageNo=1>

Among the offered scholarships are:

- Chinese Government Scholarships
- Confucius Institute Scholarship
- Chinese Local Government Scholarships
- Foreign Government Scholarship
- University Scholarships
- Enterprise Scholarships

<http://en.csc.edu.cn/Laihua/scholarshipen.aspx>

Enrolment procedures for scholarships last from January until the beginning of April. The time of applications varies depending on the scholarship program. Details can be found here:

<http://en.csc.edu.cn/Laihua/newsdetailen.aspx?cid=66&id=3074>

2. Chińskie uniwersytety (985 + 211)

Project 211, which was announced in 1993 by President Jiang Zemin, was introduced 2 years later. Its aim is additional financing of infrastructure and study paths of 100 existing universities in the amount of 20 billion USD. The government chose 80 key scientific disciplines for the development of science and 602 specializations within these 8- disciplines, which are specifically supported. These are mainly technical, mathematical and nature disciplines. The other fields that support Project 211 are commercialization of financing research, reform of school administration and enhancing international cooperation and exchange. Up to now within Project 211 aid was given to 116 academies.

Project 985, which was launched in 1998, is a kind of a complement to the previous initiatives and offers additional grants to a narrower group of academies. According to some experts it means that the Chinese government has realized that it's not possible to create 100 truly elite universities and needed to restrain the limits. The aim is to create a system of *world class universities- fine research universities, which can compete with the most prestigious institutes in the world. These universities aim to mirror the general potential of the state and play in the world's first league. Moreover their aim is to improve the general position of China in international rankings. 10 best academies were chosen to the first edition, among others Beijing, Tsinghua, Fudan, Zhejiang and Nanjing. Two first of them are perceived as leaders and each of them obtained 225 million USD during the past 5 years and other ones received 150 million.*

3. Nauka języka polskiego w Chinach

In China there are only few institutions, which enable studying Polish. In recent years one can observe an increase of students who are interested in Polish. For example at the beginning of the academic year 2013/2014 a Polish course was introduced at the University in Zhaoqing. That was possible thanks to the commitment of the head of the Department of Law and Politics professor Li Yuqin. An important support for the Polish course was given by the General Consul of the Republic of Poland in Guangzhou, Mr. Krzysztof Ciebień.

The possibility of studying Polish was received by students with lively interest. In October 2013 around 40 people were planning to take part in the Polish course. In academic year 2013/2014 two teachers held classes for two groups- "intensive course" (3 times a week) and "normal course" (2 times a week". Apart from regular language classes the participants of the Polish language course were also studying Polish culture, traditions and watched Polish films. What is more students took part in the cultural events organized by the Consulate in Guangzhou.

Polish Philology in Beijing

Polish Philology in Beijing is available in the Beijing Foreign Studies University (BFSU) in Haidian district. It is the oldest Polish Philology department in Asia and at the same time the most well-earned in China. This year Polish Philology at BFSU will celebrate 60-years since its establishment. The department of Polish Philology and Centre of Polish Studies (2011) are the part of the Department of European Languages and Cultures, where many obligatory languages from the European Union are being taught. Polish along with Czech, Romanian and Hungarian belongs to the

circle of foreign languages which are being taught, and that can be proud about their unique history and tradition.

Polish Philology in Beijing is a full-time study: 4-year Bachelor, 3-year Master and 4-year PhD. It is not a language course but a separate, independent unit, therefore classes for Chinese students take place every day. Classes held in the Department of Polish Philology consist of the following subjects: language efficiency and systems of Polish language, as well as general knowledge about Poland, history of Poland, history of Polish literature, analysis of work of literature, knowledge about society, economy and Polish administration, and both oral and written translation. Classes in translation are unique, because they are being taught by Chinese and Polish teachers in one class at the same time. Students are translating from Polish into Chinese and inversely. The subject matter of these classes is connected to the tourism of Poland and China, politics, diplomatic protocols, ecology and sports. Currently, there are four lecturers in the department of Polish Philology: Zhao Gang (Polish philologist and head of the Department of European Languages and Cultures), Li Yinan (temporarily assigned by the Ministry of Culture of the People's Republic of China to work in the Embassy of China in Warsaw), He Jun and the current teacher of Polish Andrzej Ruszer. Polish Philology is supported by well-earned professors; an outstanding translator and promoter of literature and Polish culture- Professor Yi Lijun and professor Li Jintao- long-term director of the department of Polish language. Classes in Polish Philology take place from 8 a.m. till 12 p.m. and sometimes from 2 p.m. till 4 p.m. Polish philologists have their own class, where the teaching aids with posters and photos of Poland are being kept. The teacher's office consists of two rooms, where the reference library and video collection of Polish films is situated. The current group of students is the 4th year, which on the 6th of June defended their Bachelor thesis. The class consists of 12 students. Moreover, there are 3 master seminars for 3 master students. Recruitment for Polish Philology at BFSU takes place once in 2 or 4 years. In recent years the recruitment was opened once in 4 years and it was much diversified when it comes to a number of students. In the upcoming academic year 2014/2015 the new group will consist of 24 students. Master Studies will be taken up by 3 new students, including two Poles. The language level of Bachelor studies can be estimated for B2, some of them for C1, similarly to Master students. At BFSU, the state language certificates were carried out 2 times. They testified the knowledge of Polish or other foreign language. Unfortunately, because of procedural reasons and the insufficient number of passing students in the academic year 2013/2014 the certifying exam did not take place in the Polish Philology department in Beijing. The cathedral of Polish and BFSU hosted many politicians, diplomats, translators, men of letters, poets and people from the world of culture. In December 2011 the university was visited by the president of the Republic of Poland Bronisław Komorowski, who initiated proceedings of rectors and lecturers of Polish and Chinese academies. In June Polish president unveiled plaque of the Centre of Polish Studies Puyo. Among the people who took part in the event where president's wife Anna Komorowska, ministers and under-secretaries of Ministry of Science and Higher Education, delegation of Members of Parliament and Senate with the Marshal of the Senate mr Bogdan Borusewicz.

Polish Philology at the BFSU was an organizer of many conferences, among others the Meeting of the Polish Philology in Three Countries (Beijing-Seul-Tokyo) in June 2010. The Department of Polish Philology at the BFSU with the Embassy of the Republic of Poland co-organized a session dedicated to Janusz Korczak and children laws in Beijing. During the last 3 years Polish Philology in Beijing was visited by writers: Dorota Masłowska and Jacek Dehnel. In 2012 the Institute of Book in Cracow with

the help of the Embassy of the Republic of Poland organized 3 days translation workshops for students.

Students of Polish at the BFSU have also an opportunity of benefiting from scholarship programs offered by governments of China and Poland. Usually after the second or the third year in Beijing students spend one year studying in Poland. Each year they can also take advantage of a rich offer of summer schools and scholarship of the Ministry of Higher Education "Poland for the best". In the current academic year two Master students studied at the University of Warsaw. One of them for one semester, the other one for the whole academic year.

BSJO actively cooperates with the Confucius Institute in Cracow and the Jagiellonian University, where the lecturers of Chinese language are among others graduates of the Polish Philology at BFSU. The cooperation is also connected with other academies in Poland (University of Warsaw, University of Gdańsk, and University of Silesia in Katowice). Lecturers and lecturers of the Polish Philology at the BFSU take part in many conferences, publish books and articles dedicated to glottodidactics and other domains.

Students as well as lecturers of the Polish Philology in Beijing are also frequent guests in the Embassy of Poland in Beijing. They take part in all ceremonies connected with national days. They also take part in lectures, film shows and many more cultural and artistic events. Thanks to the support of the Department of Culture of the Embassy of Poland in Beijing students have a chance to listen to the concerts of Polish classic and light music, watch the folklore dances and Polish theatre spectacles in Beijing. Students of the Polish Philology also supported the charitable action in Chaoyang Park which was organized by the spouse of the Ambassador of Poland in Beijing, as well as Open Days in the Embassy.

4. Szkolny Punkt Konsultacyjny

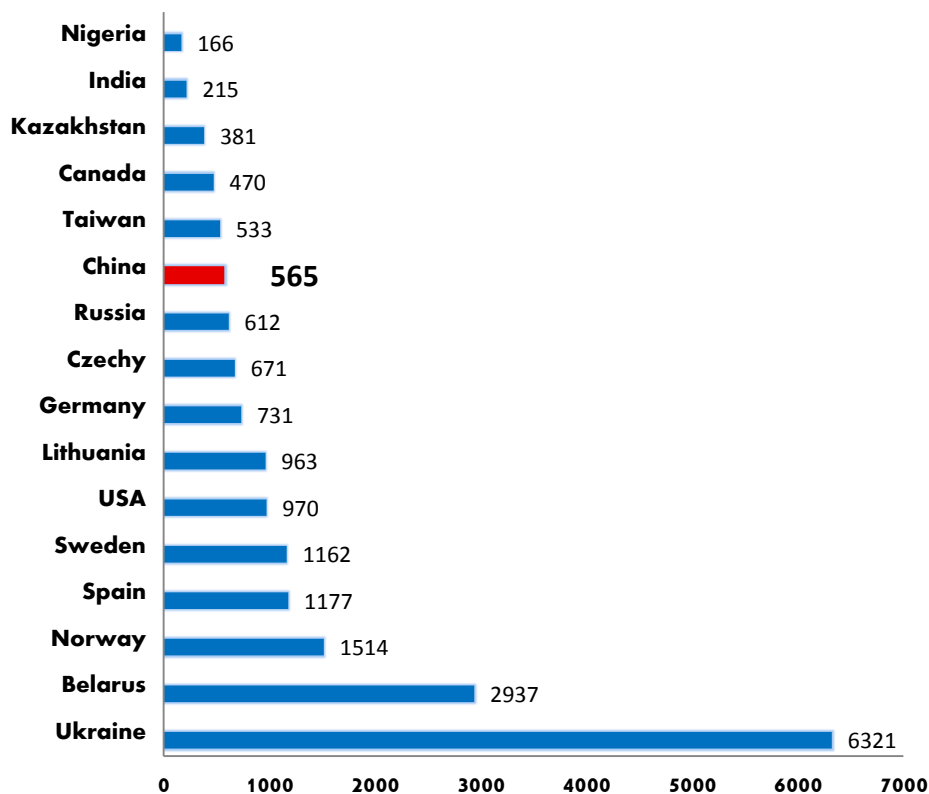

ii. Edukacja w Polsce

 Polish universities are a good choice!

- More than 650 years of academical tradition- the first polish university, Cracovian Academy was established in 1364 and was the first university in Europe which had the first department of mathematics and astronomy.
- Worldwide repute of polish academies: Jagiellonian University, University of Warsaw, John Paul II Catholic University of Lublin, AGH University of Science and Technology are proud about their long tradition and are compatible with the highest standards in Europe
- Competitive costs of living and studying along with high quality education
- Three-cycle education modelled on Bachelor/Master/Doctor
- ECTS (European Credit Transfer System) honored in the European Union.
- Member of the European Higher Education Area and European Research Area
- 448 academies- 133 public and 315 non-public (Poland had the highest number of high education institutions in Europe)
- More than 1.700.000 students

- Internationalization: more than 24 000 foreign students in the academic year 2012/2013
- Kozminski University is one of two academies in Central Europe which holds 3 accreditations AACSB, AMBA i EQUIS., which are associated with the best business institutions in Europe
- 17 Noble Prize winners come from Poland. Six of them have Polish citizenship and worked using Polish, among them were Maria Skłodowska – Curie, Henryk Sienkiewicz, Władysław Reymont, Czesław Miłosz, Lech Wałęsa, Wisława Szymborska.

Chinese students among the foreign students in Poland in years 2011/2012

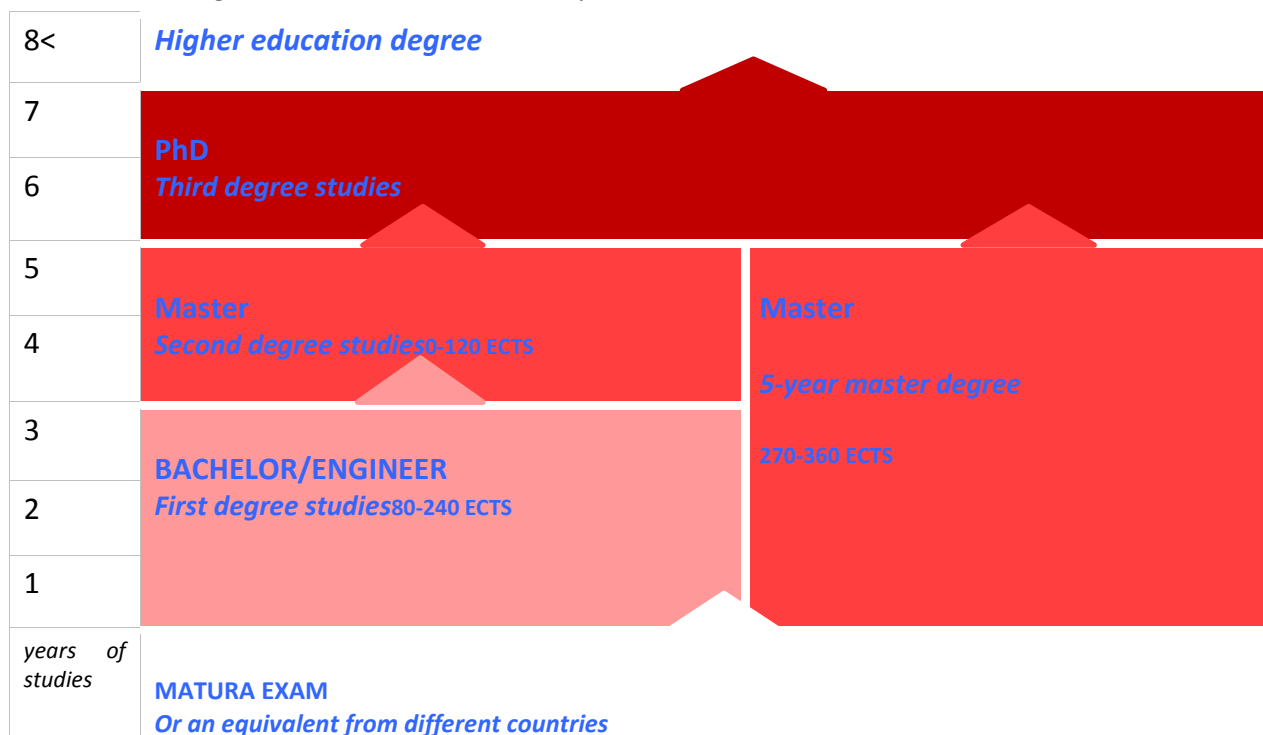

1. Polski system szkolnictwa wyższego

Types of studies in Poland

Studies in Poland offer a degree on all levels starting with the title of Bachelor finishing with PhD. In order to obtain a diploma students need to write a thesis.

First degree studies

Candidates holding a school-leaving examination certificate are accepted into the program which finishes with obtaining a bachelor degree. Studies can take between 3 and 4 years and terminate with the submission and defense of this thesis. After first-cycle studies students obtain the title of a bachelor or engineer after technical university.

Second degree studies

It is a form of studies where only candidates holding a bachelor degree can be accepted. Second degree studies finish with obtaining the title of a Master of Arts, Master of Science or equivalent (f.e. doctor, dentist, veterinary). Second degree studies last between 3 and 4 terms.

5- year Master Degree

It is a form of studies which terminates with a title of Master of Arts, Master of Science or an equivalent title. The 5-year master studies take 9 to 12 terms and require you to have obtained a Final examination certificate in Poland or abroad. These kinds of studies are obligatory on degree courses like pharmacy, law, psychology or medicine.

PhD studies

These studies are organized by authorized organizational entities of the academy, scientific institute of Polish Academy of Science, research institute or by international institute which work on the territory of Poland. Such international institutes are constituted in Poland and based on distinct laws. Only candidates holding a master degree are accepted. Third- degree studies enable you to obtain advanced knowledge in a concrete field or discipline of studies. These studies prepare for obtaining a title of doctor after a defending thesis.

Graduate Studies

It is a form of education, which accepts candidates holding a first degree title. This course can be organized at the academy, scientific institute of Polish Academy of Science, research institute or Medical Centre of Graduate Teaching. The aim of graduate studies is broadening one's knowledge in certain fields of studies. After finishing the studies, students obtain a certificate of accomplishing graduate studies, however it is not a regular diploma. After graduate studies you are also given a scientific title.

Many academic degrees are held on polish academies in two modes:

-  **Stationary** is a mode where more than half of the program is realized in the form of didactic classes, which require direct participation of academic teachers and students. Stationary classes are held from Monday to Friday. They often start in the morning and finish in the afternoon.
-  **Non-stationary** is a mode of studies, which is defined by the senate of the academy. Non-stationary studies are evening studies. This means that classes are held in the afternoon. Distance studies mean that students participate in classes during weekends. Non-stationary studies can be organized according to different modes depending on the decision of the academic authority.

In Poland there are many types of academies, where one can obtain higher education. The number of students in Poland is one of the highest in Europe. According to data from 2008 around 34 % of young polish people are students.

Types of academies in Poland

Universities

Universities are the biggest and generally the oldest academies in Poland. Their main feature is that they offer a wide range of degree courses and specializations in various departments. They possess authorization to give the title of a doctor in following fields of studies: humanities, law, economics, theology, mathematics, technology, physics, biology, medicine, chemistry, agriculture or veterinary.

Medical Universities

These are academies which are especially directed for medical science, however apart from teaching doctors they offer studies in various disciplines like pharmacy, nutrition, biotechnology, medical analytics, nursery, lifesaving and many more. Polish medical academies have the highest amount of foreign students and held special programs adjusted to teaching foreign students in English.

Universities of Technology

Technological universities are state academies which are teaching students in the field of technology. They are especially concentrated on practical approach towards science. After obtaining a title of an engineer at a university of technology many students become managers of building projects, design machines or work in the field of the development of newest technologies. Universities of technology have an opinion of the best and most frequently chosen academies among students in Poland. Polish students of universities of technology very often take part in international competitions and accomplish success, f.e. in *Inspiration Mars Student Design Contest* organized by NASA, in NetRiders competition or in *Camelot Research & Visitors Center*, which is organized by students of architecture from the whole world.

Specialist academies

In Poland there is a high amount of academies specializing on concrete disciplines of science. These are:

- **Academies of Physical Education**, which is educating physical education teachers, trainers, specialists in rehabilitation, recreation and tourism.
- **Economical Academies** educating economists
- **Academies of Nature Science and Agriculture**
- **Theological Academies**, including clerical seminars, which educate theologians
- **Pedagogical Academies**
- **Military Academies**
- **Marine Academies**

Artistic Academies

Poland has a long tradition of educating outstanding artists and musicians. Frederic Chopin and many winners of International Chopin Competition, as well as famous directors like Andrzej Munk, Roman Polański or Krzysztof Kieślowski come from Poland. Also popular contemporary artists from Poland, like Jacek Yerka, Paweł Althamer or Wilhelm Sasnal exhibiting their works in main galleries of the world. Hence Polish academies are attracting talented young people and offering the highest level of education. Among the artistic academies are: Academies of Fine Arts, Music Schools of higher level, Film Schools, state higher theatre school and more and more popular schools of fashion and design.

Private academies

Currently in Poland there are 321 private academies. In most situations they specialize in concrete fields of studies. Polish private universities include most prestige and recognizable institutions in Europe f.e. Koźmiński University, as well as academies in little towns. The quality of teaching on private academies is controlled by the Ministry of Science and Higher Education. The title of an academy can only be obtained by units which fulfill the requirements of the Ministry and the State Accreditation Committee, which is a state institute working independently in order to improve the quality of education.

Exams and grading system

The academic year in Poland is divided into two terms: winter and summer term. Both terms finish with an exam session. Performance can be measured by grades or percentage, it depends on the kind of university a student is enrolled in. Knowledge can be checked during an academic year through questioning, homework and tests. However, the most common form of measuring academic performance are exams or a realization of a project at the end of a semester.

As Poland is part of the European Union and a member of the Bologna System it participates in (ECTS) European Credit Transfer System. It means that all your courses are evaluated on an international level and that your diploma will be honored in the whole European Union, as well as in most of the countries in the world.

Grading System:

- 5- Very good
- 4+ - Better than good
- 4- Good
- 3,5- Satisfactory
- 3- Sufficient
- 2- Fail

In order to pass a course you need to obtain at least sufficient grade. Fail means that you don't get credit for your course.

2. Studia w Polsce w językach obcych

Studies in Poland in foreign languages

The majority of degree courses in Poland are carried out in Polish.

In the last years more and more universities decide to introduce foreign languages into their offer, both for Polish and international students. It is an effect of a developing cooperation between Polish and foreign academies, as well as a result of an intensive exchange of students, lecturers and scientists. Below you can find a list of the best Polish academies which offer degree courses in foreign languages. Academies are divided according to types: universities, technological universities, universities of science in agriculture, etc.

3. Nauka języka polskiego dla obcokrajowców w Polsce

Learning Polish in Poland for foreigners

Summer Polish courses for foreigners

Institutions listed below carry out Polish summer courses for foreigners. These courses are not only a good occasion for learning the basics of a language, but they also provide knowledge about Polish culture and daily life of Poles.

University of Economy in Bydgoszcz	http://eurostudies.pl/index.php?id=205
University of Warsaw, Centre of Polish Language and Culture for Foreigners Polonicum	http://www.polonicum.uw.edu.pl/page.php?id=23&lang=en
John Paul II Catholic University of Lublin	http://www.kul.pl/21.html
Maria Curie-Skłodowska University, Lublin	http://www.umcs.pl/en/courses-of-polish-language,1511.htm
Jagiellonian University in Krakow	http://www.uj.edu.pl/en_GB/polski-dla-obcokrajowcow
Nicolaus Copernicus University in Torun	http://www.umk.pl/en/cooperation/polish/
University of Wroclaw	http://www.sipik.uni.wroc.pl/index.php?id=147
Vistula University in Warsaw	http://eng.vistula.edu.pl/
Pultusk Academy of Humanities	http://www.wsh.edu.pl/palio/html.run? Instance=wsh-postgres& PageID=1& LangID=2& CheckSum=81801480
University of Silesia in Katowice	http://english.us.edu.pl/school-polish-language-and-culture

9-month preparation courses in Polish for foreigners

9-month courses prepare students for the beginning of their studies at Polish academies. Classes are held from Monday till Friday and are divided into specializations depending on the degree course the candidate wants to study. 9-month program costs around 2000 Euros, however most of the institutions offer 30 % discount for students with a Polish origin.

The period of studying on these courses counts into the period of academic studies in Poland, which means that a student is entitled to all privileges of a person enrolled at an academy.

School of Polish for Foreign Students , University of Lodz	http://www.sipdc.uni.lodz.pl/?q=node/5&language=en

11. The Department of Polish Language for Foreigners, Wroclaw University of Technology
<http://www.sjo.pwr.wroc.pl/89769,131.dhtml>

4. Rekrutacja cudzoziemców do szkół wyższych

The enrolment for foreign students is carried out by academic departments and the requirements vary depending on the degree course. Basically, all applicants for Bachelor Studies need to hold a school-leaving certificate and hold a certificate in English or be fluent in Polish. Enrolment for Bachelor Studies usually takes place in June and July. It is recommended to check enrolment requirements and deadlines with appropriate department.

One of the head foundations which are in charge of helping to enroll at academies in Poland is PACE Foundation (Polish Academic Cooperation and Exchange Foundation). Organization executes decisions of Polish-Chinese agreement on academic cooperation. PACE Foundation offers comprehensive support for students from Asia in taking decision about studying in Poland. Foundation works under the patronage of Polish Embassy in Beijing. You can start applying to Polish academia in 3 steps: select the faculty you want to study, enter your personal details and send your application.

<http://www.pacefoundation.com/en>

5. Uznawalność dyplomów

Unfortunately, there is no recognition of diplomas between China and Poland yet. However, Chinese Ministry of Education and Polish Ministry of Science and Higher Education are intensively working on an agreement on such act. We hope that it will soon be signed at the occasion of a visit by high grade officials.

As Poland is part of the European Union and a member of the Bologna System it participates in (ECTS) European Credit Transfer System, it means that all your courses are evaluated at an international level and that your diploma will be honored in the whole European Union, as well as in most of the countries in the world. The Bologna Process also supports the modernization of education and training systems, which fulfills the requirements of the changing labour market. At the same time, the Bologna reforms help to make European universities more competitive to the rest of the world.

F. Consultation

Contact person: Wang Jiaxu

Telephone: 010-66093933

Fax: 010-66093929

e-mail: jxwang@csc.edu.cn

Address: 13th floor, Building A3, No.9 Chegongzhuang Street, Beijing (100044)

7. Koszt studiów w Polsce

Full-time studies (in the Polish language) at the state Higher Education Institutions (HEIs) are free for Polish students and foreigners who commence studies in Poland on terms applicable to Polish citizens. These include citizens of the EU/EEA and students who hold the Polish Charter (Karta Polaka). All other foreigners are required to pay tuition fees of no less than:

-  EUR 2,000 per year for vocational higher studies, Master's and postgraduate programs,

- 🇵🇱 EUR 3,000 per year for doctoral, postgraduate and specialist courses as well as scientific, artistic, specialist and habilitation internships,
- 🇵🇱 EUR 3,000 per year for vocational courses and apprenticeships,
- 🇵🇱 EUR 2,000 per year for a language course, including the course preparing for study in Polish.

The fees at private higher education institutions are established by the institutions themselves. The tuition fees range from EUR 2,000 to 6,000 per year and depend on the institution and study program (for medical schools and MBA program: about EUR 8,000 – 12,000 per year).

Students aged below 26 are entitled to discounts on most means of public transport in Poland (with some differences in the discount rate under specific conditions allowing for the discount):

- 🇵🇱 national railway – 51% discount for 2nd class tickets on all types of trains except EuroCity; necessary document: a valid student card from a Polish higher education institution;
- 🇵🇱 municipal transport – usually 50% discount; necessary document: a valid Polish student card (sometimes the International Student Identity Card – ISIC).
